Best tower defense warcraft 3

Custom games are probably the coolest things about Reforged because in one game you get to play hundreds, if not thousands of other games. If you like the defensive genre of the tower, warcraft 3 is probably the place to go, as the game probably offers the best tower defense maps. Frozen Throne was the last warcraft update in a very long time and in 2020 we finally got another update on warcraft 3 Reforged. This was supposed to be the same game, but with new graphics, but still personally, I had enough to jump in. Many people compare graphics between old and new Warcraft. I'm very happy with the game although it was a bit pricy. What is the price of a Warcraft 3 Reforged? The current price for Warcraft 3 Reforged is 29 euros. There is also an additional version that costs 39 euros, but I don't see much reason for the upgrade. Now let's talk about who are the best Warcraft 3 Reforged custom maps. The way I rate who is best is simply by looking at what people play the most because I play every day. 1. Legion TD Reforged Legion is the game I personally play the most in Warcraft 3 Reforged, and from what I've seen, there are also a lot of people playing it. Legion TD has a steep learning curve and isn't the most beginner-friendly map, but it's definitely one of the addictive ones. One of the best things about Legion TD is that it's a PVP map, and it doesn't really have an ending where you win the last wave and win like some other tower defense maps. Legion TD is a 4 vs 4 map and it's really fun to play with friends. If you want a map with a minimum learning curve where you can get quickly, a green TD is a great choice. Green TD is a map where you build towers in certain places for that and you need to stick to 3 types of waves, normal, immune and air, also at the end comes 4'th boss waves. Green Circle is basically a change in green TD where players don't have to exceed a certain number of creeps. If there's a map that illustrates the imbalance in the world, it's Angel Arena. Angel Arena is a map that many love, including me, and one of the funniest things about it is to beat your characters to a ridiculous degree, a point where you can shoot others. It's a map that deserves its place on the list easily. Another classic map of old Warcraft is element TD and this is a map that impresses with a variety of towers you can build. The main idea of element TD is that you can combine various elements such as Fire, Water, Darkness, Light and Nature into combinations of towers. You can combine fire and water or water and nature or anything else to get a tower that is a combination of the two elements. X-Hero Siege was one of the classic warcraft classics of all time and now it's back in full force with Reforged. It's a pretty simple concept that you choose a hero and you have to. waves, once you've developed your character somewhat, you get to keep fighting bosses. It's a really great game, the only scam is that when you're done, it won't be updated and it's hard to convince yourself to play it again. Castle Fight has some similarities to legion TD, the goal of the game is to send units that destroy the enemy team. The difference is that you build buildings that send creeps after a certain period of time. 7. Troll vs Elves Trolls vs Elves is a map that gained popularity later than others and was trending at one point, but for some reason people started backing away from it a little bit. Often, either the troll or the magnies get too much of an advantage and the game becomes a bit unbalanced, causing players to leave it. But if you want to play long games, Trolls vs Tontut is a good warcraft 3 restaforaged map for that. Your experience on this website will be enhanced by allowing cookies. This map is always considered a classic based on its impact on the custom map community and the gaming industry as a whole. League of Legends Official website DOTA 2 Official website Footmen FrenzyFootmen Frenzy was a very popular WC3 Custom Map on its hay day because since then it really hasn't found that much success. As far as I know, the original map creators haven't left and made their own play based on the design of this map, as many others have done. At the beginning, you choose from one Hero and use it and a continuous spawning group for the unit to fight it against other players in the middle of the map, where items and weapons can also be purchased for your hero. This map can be played in 1v1v1v1 or because it has more commonly played 3v3v3v3 Legion TDOne from the most popular TDs, and one that allows players to send enemy units to other players who create a PVP element on a custom TD map. Map developers make their own separate game, which can be found in steam. Legion TD 2 Official Website Element TDIf you are looking for a solid and simple Tower Defense game to pick up and play, look no further for Element TD, a highly recommended choice for anyone who enjoys TD or even players who are new to the game genre. The original creators have been working on a batch version of the game that can be found on Steam and mobile devices. Element TD Android WintermaulAnother very popular TD map that allows players to build their towers to control how enemy waves approach. This small but unique mechanic for Wintermaul helps stand out from TD, such as Element, where you only have separately defined spaces for positioning towers.
