Originally published: August 12, 2019 Union Pacific 9000 is an important part of steam development history and one of only three-cylinder steam locomotives preserved. ©2015 Ryan C Kunkle, licensed for About.com, Inc. George Stephenson invented the steam locomotive, the forerunner of modern trains, in 1814. After 10 months of tinkering, Stephenson, who worked in the mining industry, produced his first train he named, Blucher. Stephenson's track was only 400 feet. but its engine pulled out eight loaded coal cars weighing 30 tons at about 4 mph. Since then, trains have been an integral part of world and American history, notes History.com: Trains helped the North win the Civil War. The world's first travel agency got its start thanks to a train trip. The railroad gave us standardized time zones. Miles of rail line in the United States reached its peak in 1916 (with nearly 400,000 miles). As of 2014, there were still more than 160,000 miles of train lines in the U.S., with each mile creating more than \$820,000 a year, according to Rail Serve.
